

SOLUTIONS FOR FASTER DELIVERY OF VIDEO, WEBSITE CONTENT AND LIVE BROADCASTS

CONTENT DELIVERY NETWORK (CDN)

Your company website may be in one place, but your users are scattered all around the world. Content Delivery Network (CDN) is a solution that brings your content closer to your audience. It provides the exact, scalable solution you need to accelerate and deliver a wide range of content.

ADVANCED CONTENT DELIVERY

The Content Delivery Network (CDN) services are brought to you in association with Tata Communications Limited. Our CDN offers one of the most advanced network services for content delivery. This is done with an interconnected system of computers that provides web content rapidly to numerous users by duplicating or caching it on multiple server and directing it to users based on proximity. You can grow your audience and revenue streams by delivering to virtually any device, including PCs, laptops, iOS devices, Android devices, Blackberries and set-top boxes.

Media Distribution or Media Delivery

- For entertainment properties such as sporting events, television programmes, movies, etc.
- Live broadcasts over the internet of one-time events, e.g.: swearing-in ceremony of a head of state
- Corporate communications such as corporate videos, weekly meetings, etc.

Website Acceleration/Caching

- Usually used for websites whose users are spread over a wide geographic area such as retail, online reservations and ticketing and online newspapers

Large File/Software Delivery

- Popular with advertising and gaming companies

**WHILE A CDN
CAN BE USED
FOR ANY TYPE
OF WEBSITE,
IT IS PRIMARILY
USED IN THREE
APPLICATION
AREAS**

BUSINESS ADVANTAGES

- Deliver live content on any device, anywhere
- Control costs with low capital investment
- Avoid challenges of scaling infrastructure and focus on the competencies central to your business
- Go to market faster with easy deployment services
- Leverage internet to reach vast geographies

- Optimized for large file delivery such as videos, downloads, and media-rich content
- Optimized network architecture for delivery of applications and broadcasts in real-time
- Broadcast to multiple devices simultaneously - PCs, tablets mobile devices and set-top boxes
- Automated content pull connector from the customer origin: pull-once/download many
- Have our CDN pull files from your origin server, upload content to our CDN origin servers and save content for distribution in our cloud storage
- Get optional security product suite to protect copyrighted content
