

Avaya HC020 Camera

Quick Setup Guide

Congratulations on purchasing your PTZ HC020 Camera for the Avaya Scopia® XT Series. This brings a high quality 4K sensor video source to your endpoint, with HD 1080p 30 frames per second (fps), including 8x Digital zoom, and an optimal horizontal field of view for video conferencing rooms.

Package Content:

- Avaya HC020 Camera
- 3m USB Cable
- Remote Control
- Remote control Batteries

Setting Up this Device

Avaya HC020 Camera can be used as first or additional camera on XT4300, XT5000, and XT7100. Please follow the below instructions to connect and use HC020 Camera.

CAUTION: Make sure all units are switched off whenever connecting or disconnecting devices.

1. Use HC020 Camera as main camera

Step 1

Insert the USB connector to its socket at rear of the camera.

Step 2

Attach the USB connector to the USB upper socket at the rear of the XT Series endpoint (XT4300, XT5000 or XT7100).

Step 3

If using HC020 as first camera, you should enable it as Default Camera in: **Configure > Advanced > I/O connections > Cameras > General > Default Camera: USB**

- Please remove the **SMALL** plastic lens cover before using the camera
- The video signal is captured from the USB port of the XT unit. As alternative, the HDMI port can be used, connecting the HDMI of the camera to the XT unit (HDMI cable not included in the box). USB port is also used for camera control.

2. Use HC020 Camera as USB camera for your Equinox client

Step 1

Connect the HC020 Camera to your laptop.

Step 2

Launch the Equinox client and select the device (Avaya HC020) from the Settings > User Preferences page of your Equinox Client.

Step 3

Under this configuration, HC020 camera can be controlled using the provided remote control.
