## INTRODUCTION

Property Management System is a software application used in the hospitality industry to automate some hotel functions such as guest booking, guest details, etc...

The system can be divided into two parts:

- PMS (Property Management System)
- PBX

Grandstream UCM6XXX series have integrated Mitel PMS providing following hospitality features: Check-in, Check-out, set Room Status, Wake-up call and more.

The following figure illustrates the communication flow between the PBX (Grandstream UCM6xxx Series) and PMS software (Mitel). The communication between both parties is direct with no middleware.

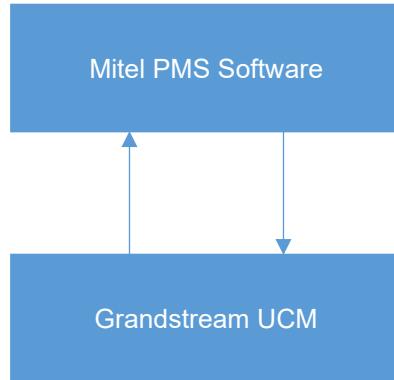

Figure 1: UCM & PMS interaction

## SUPPORTED PMS FEATURES

The UCM6xxx supports the following features using Mitel PMS Systems.

Table 1: PMS Supported Features

Features
Check-In
Check-out
Wake-up Call
Name Change
Set Credit
Set Station Restriction

### Check-in

**Check-in** feature is used to store information such as Room Number, Extension, Username, Guest Account, Guest Credit Money, Maid Code, Arrival/Departure Date upon guest arrival.

Guest language can also be received from PMS to customize phone system prompts (if possible).

<input type="checkbox"/>	Address	Room Number	Extension	Room Status	User Name	Guest Account	Guest Category Code	Guest Credit Money	Maid Code	Options
<input type="checkbox"/>	2000	2000	2000	Check-in	JohnDoe			1155		 

Figure 2: Check-in

### Check-out

**Check-out** feature is used upon guest departure to clear stored data at check-in and restore extension's default settings including language, privileges and deleting all voicemails on that extension.

The "Room Status" will be set to "checkout".

<input type="checkbox"/>	Address	Room Number	Extension	Room Status	User Name	Guest Account	Guest Category Code	Guest Credit Money	Maid Code	Options
<input type="checkbox"/>	2000	2000	2000	Check-out						 

Figure 3: Check-out

### Name Change

**Name Change** feature is used to add a name, delete or replace it from Mitel PMS system.

<input type="checkbox"/>	Address	Room Number	Extension	Room Status	User Name	Guest Account	Guest Category Code	Guest Credit Money	Maid Code	Options
<input type="checkbox"/>	2000	2000	2000	Check-in	ChangedName			1155		 

Figure 4: Add/Replace/Delete Name

## Set Credit

This feature is used to set the guest credit money, PMS send the set credit command to set the guest money credit on the UCM6XXX.

	Address	Room Number	Extension	Room Status	User Name	Guest Account	Guest Category Code	Guest Credit Money	Maid Code	Options
	2000	2000	2000	Check-in	JohnDoe			976		 

Figure 5: Set Credit

## Set Station Restriction

This feature is used to set restriction on the extension permission.

4 level of permissions are allowed on the extensions:

- Internal
- Local
- National
- International.

The PMS send the restriction command to the UCM6XXX, and the UCM update the permission on the extension.

## Wake-up Call

**Wake-up** feature is used to make the extension ring upon PMS signal.

The UCM sends a notification message to the PMS including time and date of answered call in order for the system to repeat (or not) the wake-up call.

### Wake-up Call Action Status

- When setting up a Wake-up call on the PMS, UCM6XXX initially sets “Action Status” to **Programmed**.
- Once the call is made, UCM6XXX sets “Action Status” to **Executed**.
- Programmed Wake-up calls can be **Cancelled** from the PMS, the UCM will update the Action Status to **Cancelled** as shown on the following figure.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Cancelled	Single	No action	2017-08-10	09:30	 

Figure 6: Wake-up Call Cancelled

## Wake-up Call Types

Two types of wake-up call are available:

### Single

The call will be repeated once at the programmed time.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Programmed	Single	No action	2017-08-10	09:30	 

Figure 7: Single Wake-up Calls

## Daily

The call will be repeated each day at the programmed time.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Programmed	Daily	No action	2017-08-10	09:30	 

Figure 8: Daily Wake-up Calls

## Wake-up Answer Status

Three Answer Statuses are available in response to the Wake-up call:

### Answered

If the guest answers the wake-up call, UCM6XXX will set “Answer Status” to **Answered**.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Executed	Daily	Answered	2017-08-10	06:53	 

Figure 9: Wake-up Call Answered

### Rejected

If the guest rejects the wake-up call, UCM6XXX will set “Answer Status” to **Busy**.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Executed	Daily	Busy	2017-08-10	06:54	 

Figure 10: Wake-up Call Busy

### No Answer

If the guest doesn’t answer the wake-up call after timeout, UCM6XXX will set “Answer Status” to **No Answer**.

Room Number	Action Status	Type	Answer Status	Date	Time	Options
2000	Executed	Daily	No Answer	2017-08-10	06:55	 

Figure 11: Wake-up Call No Answer

### Error

If an error occurs during the wake-up call, UCM6XXX will set “Answer Status” to **Error**.

Room Number ▾	Action Status ▾	Type ▾	Answer Status ▾	Date	Time	Options
2000	Executed	Daily	Error	2017-08-10	06:59	 

Figure 12: Wake-up Call Error

## Mini Bar

**Mini Bar** feature is used by the maid to monitor the consumer's goods.

Users need to create first a mini bar and the maid code to consult the goods, please refer to **Mini Bar** for more details.

## UCM6XXX CONFIGURATION

Following configuration are based UCM6XXX with firmware 1.0.20.17. The configuration may vary using higher firmware versions.

### Create Extensions

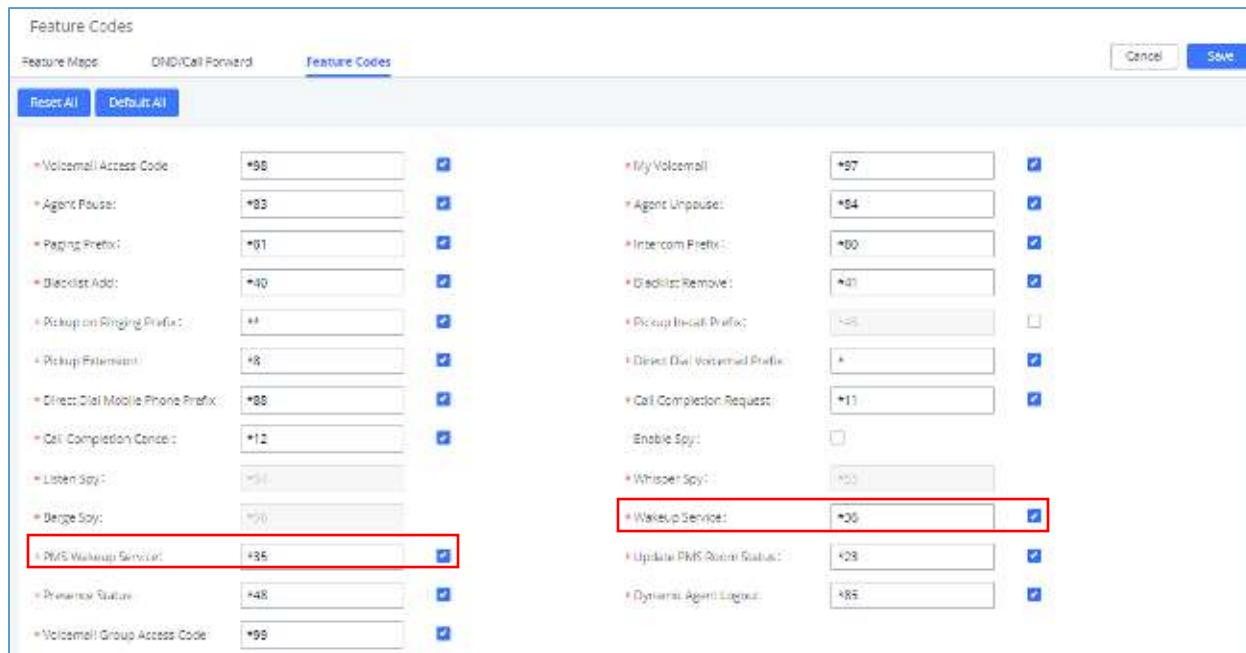

To configure the UCM6XXX with a PMS Server, users need first to create some extensions on the UCM6XXX that will be associated with guests' rooms.

To create or modify existing extensions, log in to the UCM6XXX's by typing its address on a browser, then go to Extension/Trunk→Extensions.

### Configure UCM6XXX with PMS Server

To use all PMS features, make sure that the following feature codes are configured from UCM6XXX Web GUI→Call Features→Feature Codes→Feature Codes:

- **Update PMS Room Status**
- **PMS Wake Up Service**

Feature Code	Description	Status
*98	VoiceMail Access Code	<input checked="" type="checkbox"/>
*83	Agent Pause	<input checked="" type="checkbox"/>
*81	Paging Prefix	<input checked="" type="checkbox"/>
*40	Blocklist Add	<input checked="" type="checkbox"/>
#*	Pickup on Ringing Prefix	<input checked="" type="checkbox"/>
#8	Pickup Extension	<input checked="" type="checkbox"/>
*88	Direct Dial Module Phone Prefix	<input checked="" type="checkbox"/>
*12	Cell Completion Control	<input checked="" type="checkbox"/>
*90	Listen Spy	<input type="checkbox"/>
*90	Barge Spy	<input type="checkbox"/>
+35	PMS Wakeup Service	<input checked="" type="checkbox"/>
*48	Priority Status	<input checked="" type="checkbox"/>
*99	VoiceMail Group Access Code	<input checked="" type="checkbox"/>
+97	My VoiceMail	<input checked="" type="checkbox"/>
*84	Agent Unpause	<input checked="" type="checkbox"/>
*80	Intercom Prefix	<input checked="" type="checkbox"/>
*81	Blocklist Remove	<input checked="" type="checkbox"/>
#*	Pickup In-call Prefix	<input type="checkbox"/>
*	Direct Dial Voicemail Prefix	<input checked="" type="checkbox"/>
*11	Cell Completion Request	<input checked="" type="checkbox"/>
<input type="checkbox"/>	Enable Spy	
+90	Whisper Spy	<input type="checkbox"/>
+35	WakeUp Service	<input checked="" type="checkbox"/>
+28	Update PMS Room Status	<input checked="" type="checkbox"/>
*88	Dynamical Agent Logout	<input checked="" type="checkbox"/>

Figure 13: PMS Feature Codes

Navigate to **Value-added Features→PMS→Basic settings**, the following table explains the fields needed to be configured to set the connection for PMS system.

Table 2: PMS Basic Settings

Field	Description
PMS Module	Select Mitel to use Mitel PMS system features

<b>Wake Up Prompt</b>	Choose the prompt to be played upon Wake-Up call request, users can click on Prompt to upload a customer prompt to the UCM6XXX.
<b>UCM Port</b>	Enter the UCM6XXX's port to use when communicating with Mitel PMS system.
<b>Back Up Voicemail Recordings</b>	Used for backing up voicemail recordings to external storage after check-out.

PMS

Basic Settings	Room Status	Wakeup Service	Mini Bar	Maid
PMS Module:	Mitel			
Wakeup Prompt:	Wake Call			
* UCM Port:	8081			
Back Up Voicemail Recordings:	<input type="checkbox"/>			

Figure 14: PMS Basic Settings - Mitel

## Room Management

Users can then create and manage Rooms from **Value-added Features→PMS→Room Status**:

- Click **Add Room** to Create a new room for a guest.

Create New Room

* Address:	1000
* Room Number:	1000
* Extension:	1000 "John DOE"
Guest Account:	
Guest Category Cod...	
Guest Credit Money...	
Maid Code:	
Arrival Date :	
Departure Date :	

Figure 15: Create a New Room

- Click on **Delete Selected Rooms** to delete any selected room.

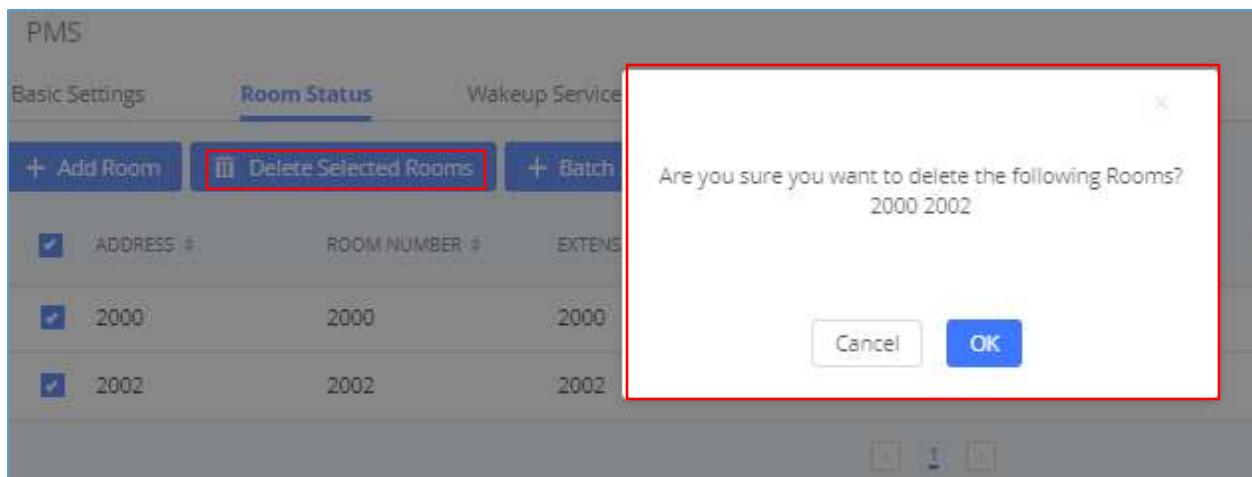

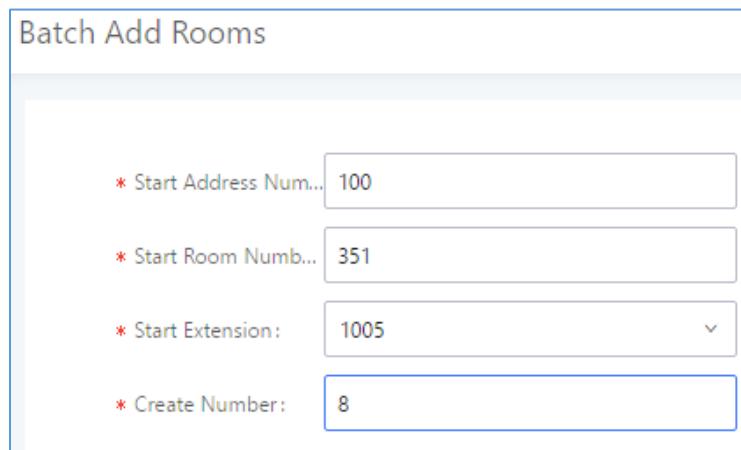

Figure 16: Delete Selected Rooms

- Click on **Batch Add Rooms** to create multiple rooms at the same time.

The dialog box is titled 'Batch Add Rooms'. It contains four input fields with validation stars (\*):  
 \* Start Address Num...: 100  
 \* Start Room Numb...: 351  
 \* Start Extension: 1005  
 \* Create Number: 8

Figure 17: Batch Add Rooms

- User can also click on  next to a room to delete it, or click on  to edit the room's options.

The screenshot shows the 'Room Status' tab in the PMS interface. It displays a list of rooms with columns for ADDRESS #, ROOM NUMBER #, EXTENS, ROOM STATUS, USER NAME, GUEST CATEGORY CODE, ARRIVAL DATE, DEPARTURE DATE, and OPTIONS. The 'Delete Selected Rooms' button in the top navigation bar is highlighted with a red box.

ADDRESS #	ROOM NUMBER #	EXTENS	ROOM STATUS	USER NAME	GUEST CATEGORY CODE	ARRIVAL DATE	DEPARTURE DATE	OPTIONS
<input type="checkbox"/> 2000	2000	2000	Credit-out					 
<input type="checkbox"/> 2002	2002	2002	Credit-out					 

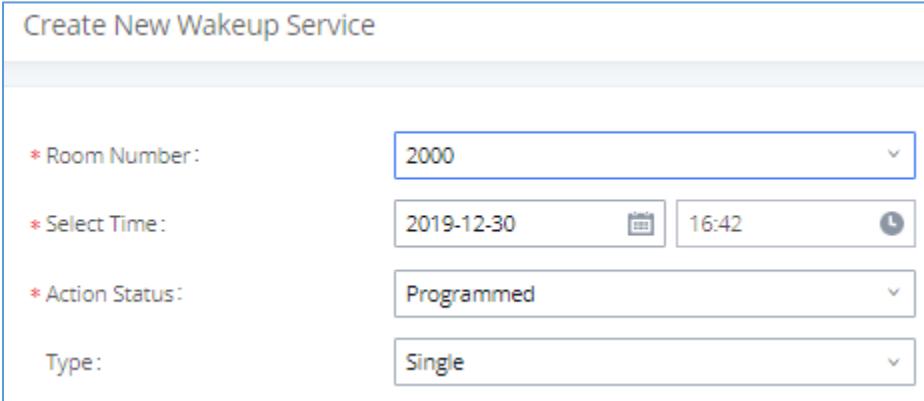

Figure 18: Room Status

## Wake Up Service

Users can create a New Wake Up service for Rooms from **Value-added Features→PMS→Wake Up Service**.

Click on **Add**, the following window will pop up:

The dialog box is titled "Create New Wakeup Service". It contains four input fields with dropdown menus:  
 - \* Room Number: 2000  
 - \* Select Time: 2019-12-30 16:42  
 - \* Action Status: Programmed  
 - Type: Single

Figure 19: Create New Wake Up Service

Please refer to the following table for fields description of Wake-Up Service:

Table 3: PMS Wake Up Service

Field	Description
<b>Room Number</b>	Select the room number where to call.
<b>Select Time</b>	Set the time of the wakeup call.
<b>Action Status</b>	Show the status of the call: <ul style="list-style-type: none"> <li>• <b>Programmed:</b> the call is scheduled for the time set</li> <li>• <b>Cancelled:</b> the call is canceled</li> <li>• <b>Executed:</b> the wakeup call is made</li> </ul>
<b>Type</b>	<ul style="list-style-type: none"> <li>• <b>Single:</b> The call will be made once on the specific time.</li> <li>• <b>Daily:</b> The call will be repeated every day on the specific time</li> </ul>

The following figure shows the status of the wakeup call once the call is made at the specified time

Name	Extension	Status	Action Status	Answer Status	Date	Time	Options
John	1000	Enabled	Executed	Answered	2017-05-04	05:18	 

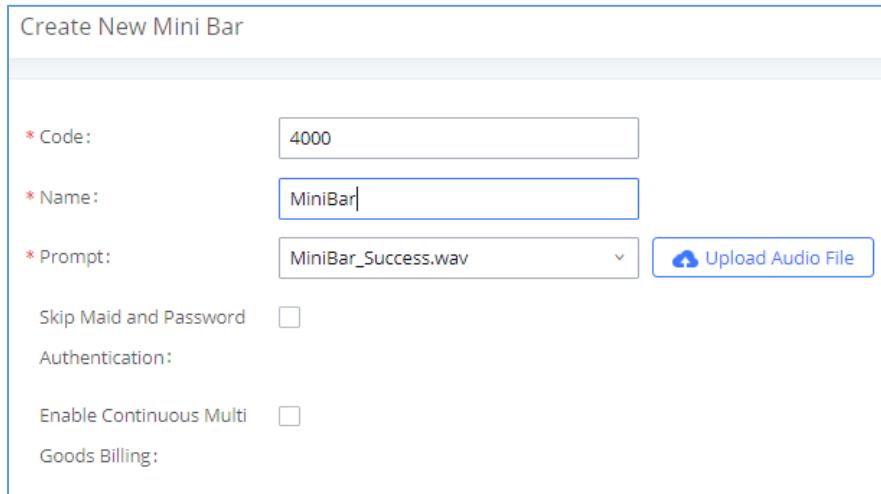

Figure 20: Wake Up Call Executed

## Mini Bar

### Create New Mini Bar

To create a new mini bar, click on “**Add Mini Bar**” under UCM webGUI→**Value-added Features→PMS→Mini Bar**, the following window will pop up:

The screenshot shows the 'Create New Mini Bar' configuration window. It includes fields for 'Code' (4000), 'Name' (MiniBar), 'Prompt' (MiniBar\_Success.wav), and several optional checkboxes: 'Skip Maid and Password', 'Authentication', 'Enable Continuous Multi Goods Billing', and 'Goods Billing'. There is also a 'Upload Audio File' button.

Figure 21: Create New Mini Bar

Table 4: Create New Mini Bar

<b>Code</b>	Enter a non-existing extension number to be dialed when using the mini bar feature.
<b>Name</b>	Enter a name for the mini bar.
<b>Prompt</b>	Select the Prompt to play once connected to the mini bar.
<b>Skip Maid and Password</b> <b>Authentication</b>	If enabled, the default maid code will be 0000, no authentication is required. Enter 0000 followed by # to access the consumer goods.
<b>Enable Continuous Multi Goods Billing</b>	If enabled, please separate the goods' codes by * (star).

To create a new prompt please refer to **CREATE CUSTOM PROMPT**

### Create New Maid

Once the Mini Bar created, a new maid needs to be created to consult the consumer goods.

To create a new maid, click on **Add** under UCM webGUI→**Value-added Features→PMS→Mini Bar**, the following window will popup:

Create New Maid

* Maid Code:	1100
* Password:	123456

Figure 22: Create New Maid

Table 5: Create New Maid

<b>Maid Code</b>	Enter a code to identify the new maid. Only digits accepted. This code is required to identify the maid when checking consumer's goods.
<b>Password</b>	Enter a password associated with the maid. Only digits accepted.

User could either edit the “Maid” secret by clicking on , or delete a maid by clicking on  to remove the selected maid.

## Create Consumer Goods

Create then the consumer goods and set associated prompts to them.

- To create a new consumer goods, click on  under UCM webGUI→Value-added Features→PMS→Mini Bar, the following window will popup:

Create New Consumer Goods

* Code:	<input type="text"/>
* Name:	<input type="text"/>

Figure 23: Create New Consumer Goods

Table 6: Consumer Goods

<b>Code</b>	Enter the Goods Code.
<b>Name</b>	Enter the Name of the Goods

- Users could edit the created consumer goods by clicking on , All the parameter could be changed (Name, Success Prompt, Failure Prompt) except for the consumer goods “Code” as shown below:

Edit Consumer Goods: Water

* Code:	101
* Name:	Water

Figure 24: Edit Consumer Goods.

- To delete a consumer goods user could click on  to remove the item.

The Minibar page shows as following:

PMS			
Basic Settings	Room Status	Wakeup Service	Mini Bar
<a href="#">+ Add Mini Bar</a>			
CODE		NAME	OPTIONS
4000		Minibar	 
<a href="#">+ Add Consumer Goods</a>			
CODE		NAME	OPTIONS
101		Water	 

Figure 25: Mini Bar

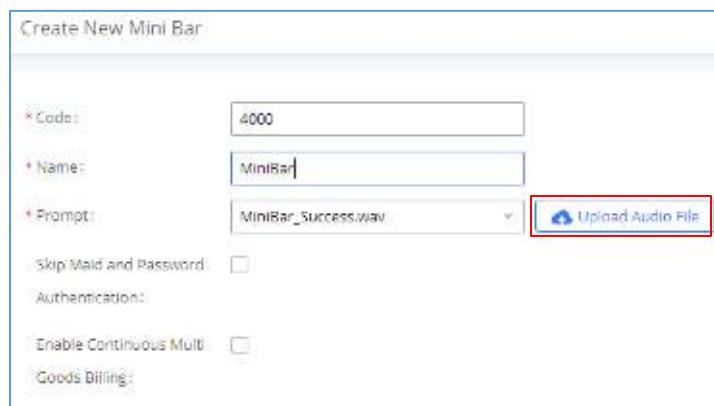

## Using Mini Bar

To use Mini Bar feature, follow the steps below:

1. Make a call to the Mini Bar extension (4000 in this example), a voice prompt will be played.
2. Enter the Maid Code followed by star and the password followed by pound (example: 1100\*123456#).
3. Type the consumer's code that the Maid wants to check followed by pound (example: 101#).

## CREATE CUSTOM PROMPT

Prompts on PMS can be customized/personalized at customer's convenience by either recoding or uploading new prompts. Click on "Prompt" option as shown on the following figure to be redirected to "Custom Prompt" page, or go to Web GUI→PBX Settings→Voice Prompt→Custom Prompt page directly.

The dialog box has the following fields:

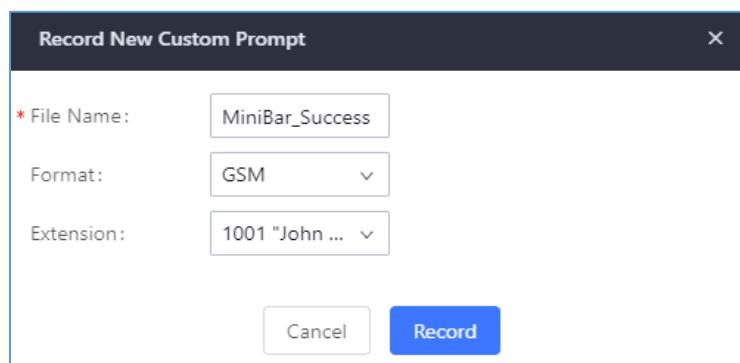

- Code:** 4000
- Name:** MinIBar
- Prompt:** MinIBar\_Success.wav
- Upload Audio File:** A blue button with a cloud icon.
- Other Options:** Skip Maid And Password, Authentication, Enable Continuous Multi, Goods Billing.

Figure 26: Customize Prompt

Once the PMS prompt file (created/uploaded) is successfully added to the UCM6xxx, it will be shown in the prompt list options to select in different PMS scenarios.

## Record New Custom Prompt

In the UCM6xxx web UI→PBX Settings→Voice Prompt→Custom Prompt page, click on **+ Record** and follow the steps below to record new prompt.

The dialog box has the following fields:

- File Name:** MiniBar\_Success
- Format:** GSM
- Extension:** 1001 "John ..."
- Buttons:** Cancel, Record

Figure 27: Record New Prompt

1. Specify the custom prompt file name.
2. Select the format (GSM or WAV) for the prompt file to be recorded.
3. Select the “Extension” to receive the call from the UCM6xxx to record the prompt.
4. Click the “Record” button. A call will be initiated to the selected extension.
5. Pick up the call and start the recording following voice prompts.
6. The recorded file will be listed in the Custom Prompts page (see figure 30). Users could select to rerecord, play or delete the recording.

Figure 28: Custom Prompt

## Upload Custom Prompt

If the user has a pre-recorded prompt file, navigate on in Web GUI under **PBX Settings→Voice Prompt→Custom Prompt** page to upload the file to the UCM6xxx.

Following are PMS prompt requirements to be accepted by UCM6xxx series:

- PCM encoded.
- 16 bits.
- 8000Hz mono.
- In .mp3 or .wav format; or raw/ulaw/alaw/gsm file with “.ulaw” or “.alaw” suffix.
- File size under 5M.

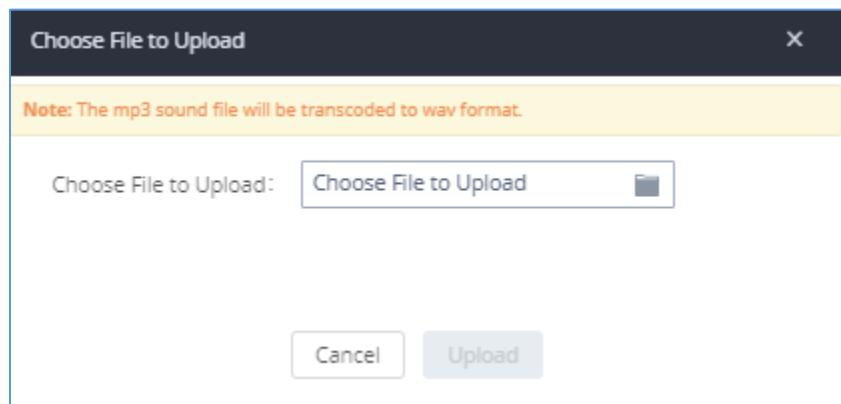

Figure 29: Upload Custom Prompt

Click on button to select audio file from local PC and click on it to start uploading it. Once uploaded, the file will appear in the “Custom Prompt” web page.
